Please allow XM radio to continue thier local weather/traffic broadcasts. Especially in heavily congested areas, like the DC area where I live, you need access to up-to-date, detailed traffic information -- all the time, not just "local on the 8s". Better informed drivers will help avoid more congestion! And when these same people travel to other cities, they will instantly know where on their radio they can go to receive traffic info for the unfamiliar city. I strongly encourage you to allow XM to continue broadcasting this valuable information. As a subscription radio service, shouldn't the customer be able to pay to get the information that they want?? PLEASE REJECT NAB petition 04-160! Let the free radio stations get the weather/traffic info that the NAB thinks they should have, and let subscribers have the info they want!!
